Made from compostable materials that can break down naturally under composting conditions, helping to reduce environmental impact and support sustainable packaging solutions.

Safe for use in microwave ovens, allowing convenient reheating of food without compromising performance or food safety.

Designed to withstand high oven temperatures, making it suitable for baking and cooking applications without warping or releasing harmful substances.

Maintains strength and flexibility at low temperatures, ensuring reliable performance during freezing and cold storage.

Features an effective grease-resistant barrier that prevents oil and moisture penetration, keeping food fresh and packaging clean.

Coated with a high-quality silicone layer to provide excellent non-stick performance, easy food release, and enhanced heat resistance.
